CITIES

CITIES provides an international and interdisciplinary platform for the exchange of ideas and information between urban planners and policy makers from national and local government, non-governmental organizations, academia and consultancy. The primary aims of the journal are to analyse and assess past and present urban development and management as a reflection of effective, ineffective and non-existent planning policies; and the promotion of the implementation of appropriate urban policies in both the developed and the developing world. All articles are refereed.

Editorial contributions should be sent in triplicate to The Editor.
